

# Cloudflare edge side includes

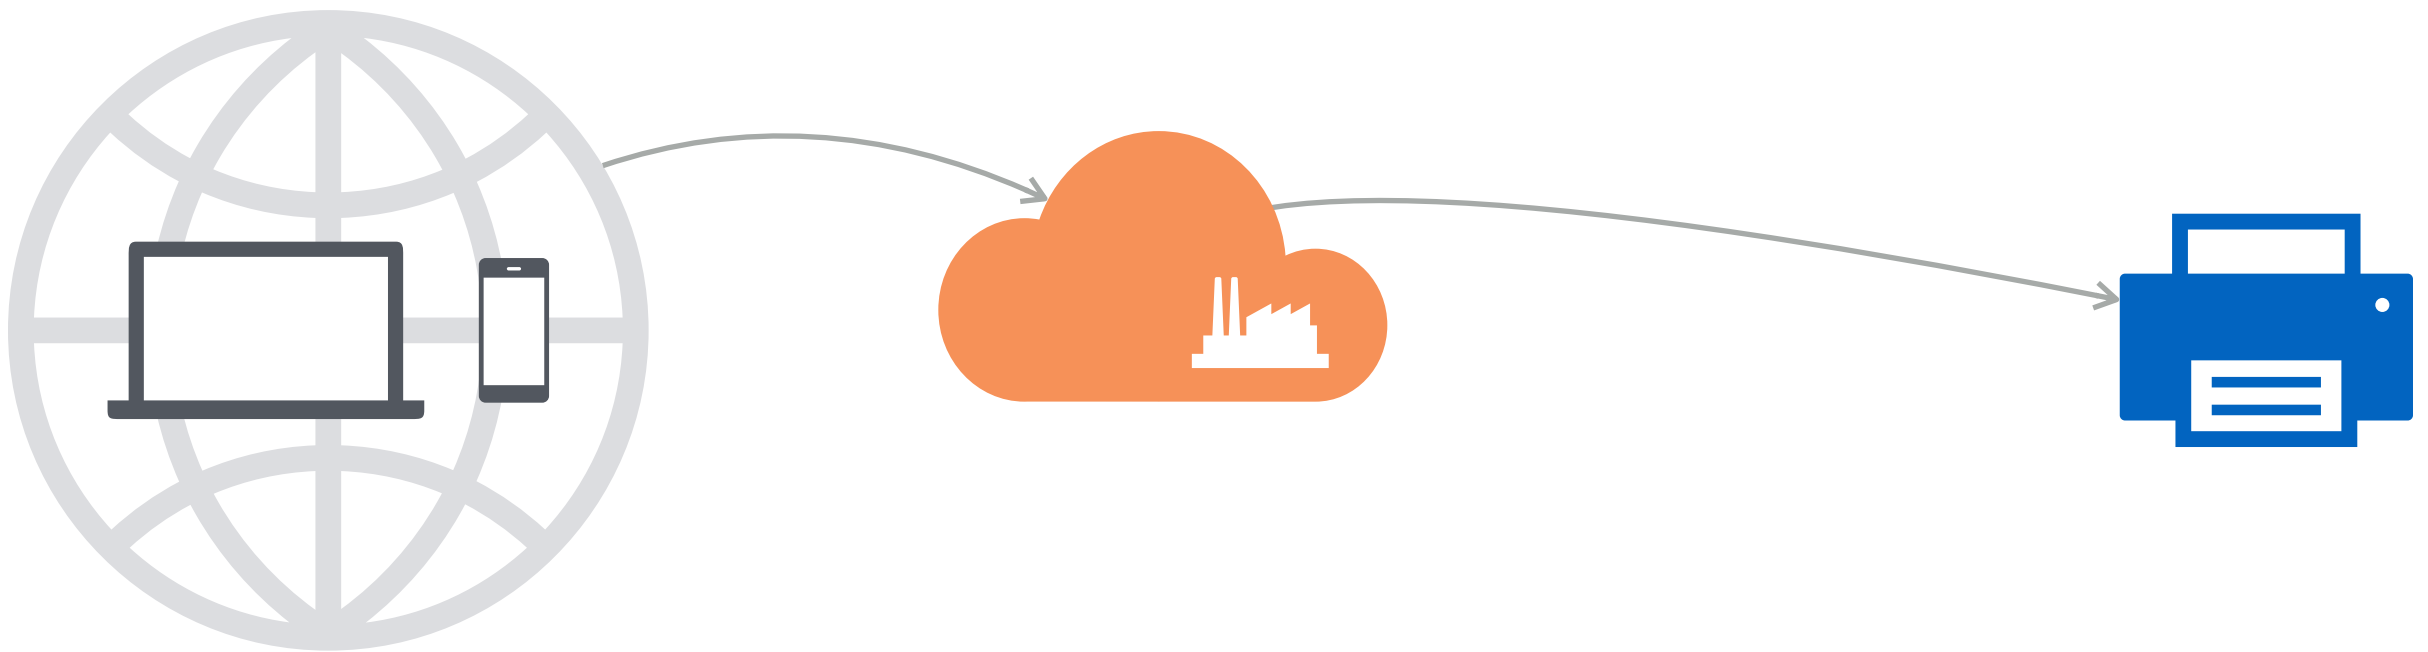

*a gif by Lukas Rieder*

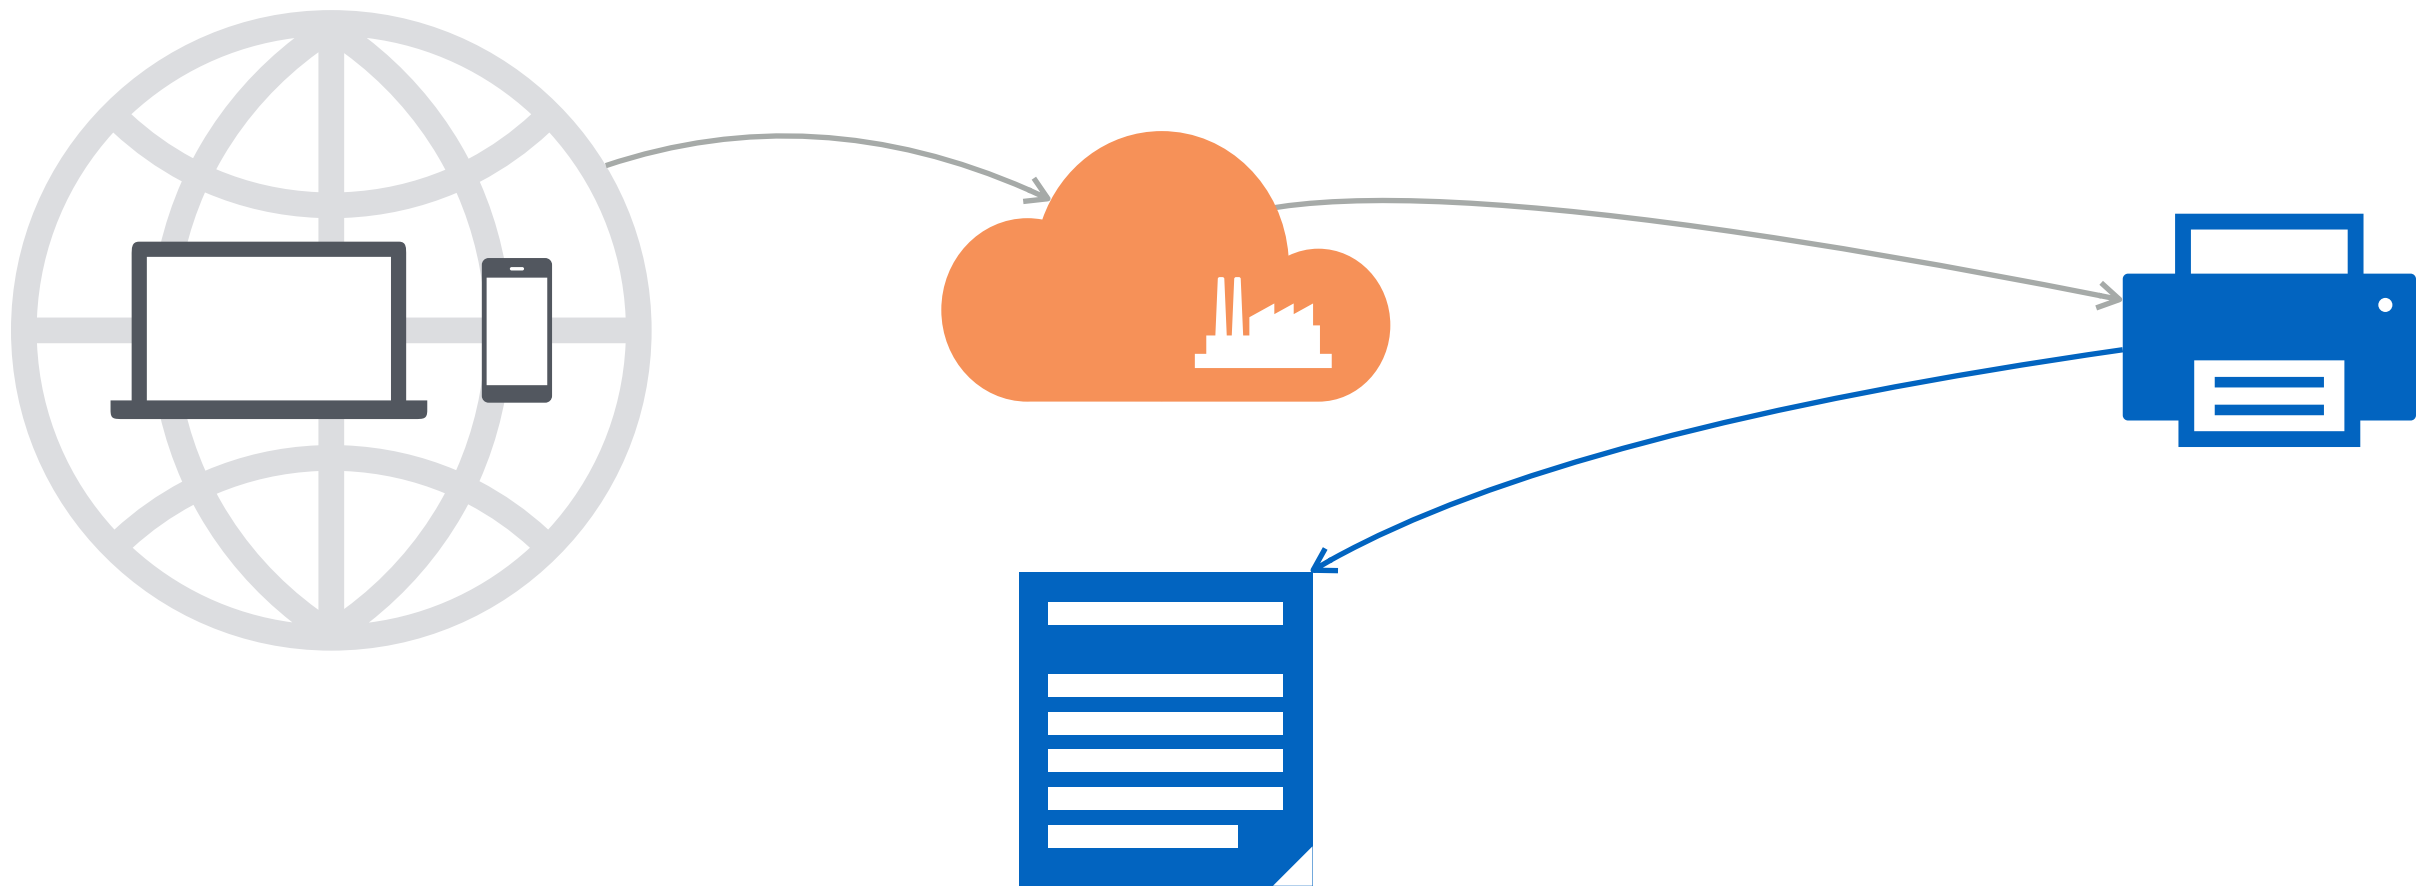

Cloudflare receives a request

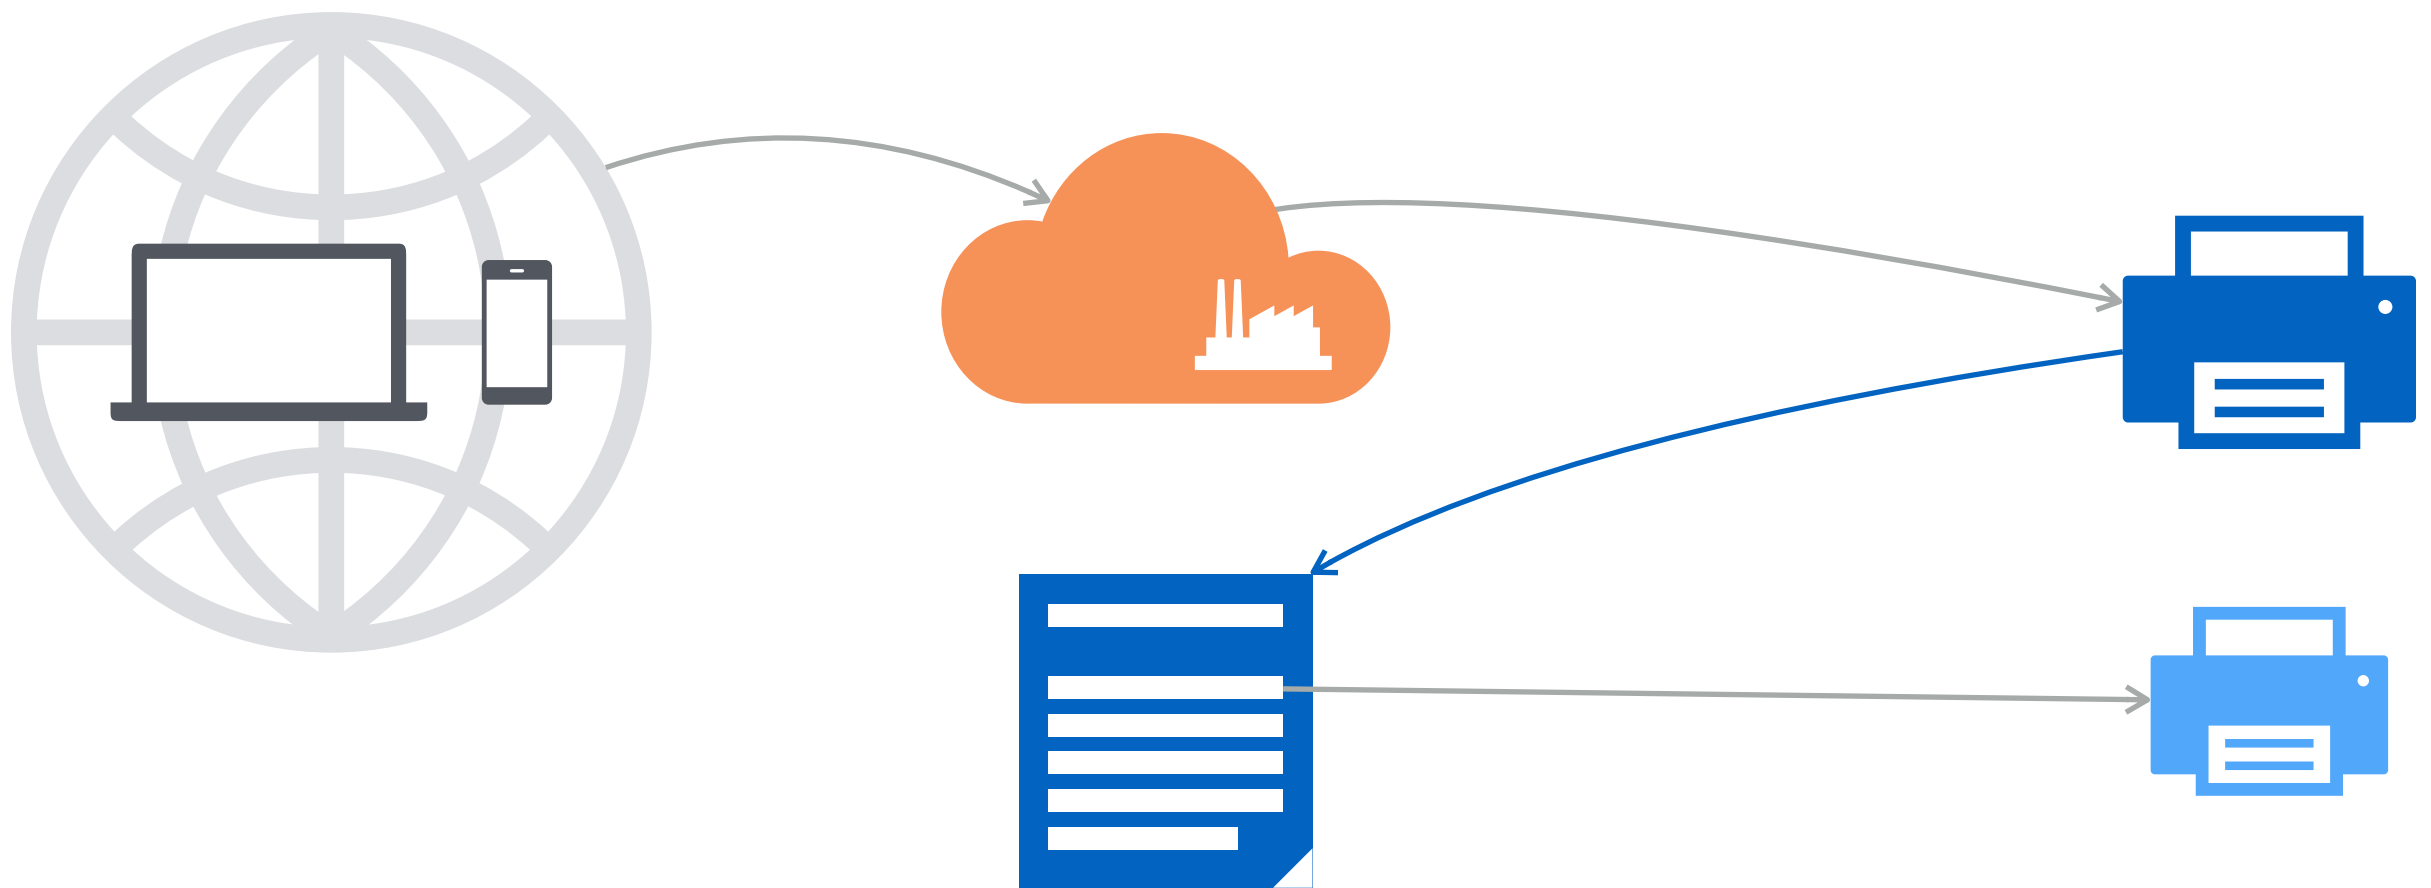

The worker fetches the page from the origin

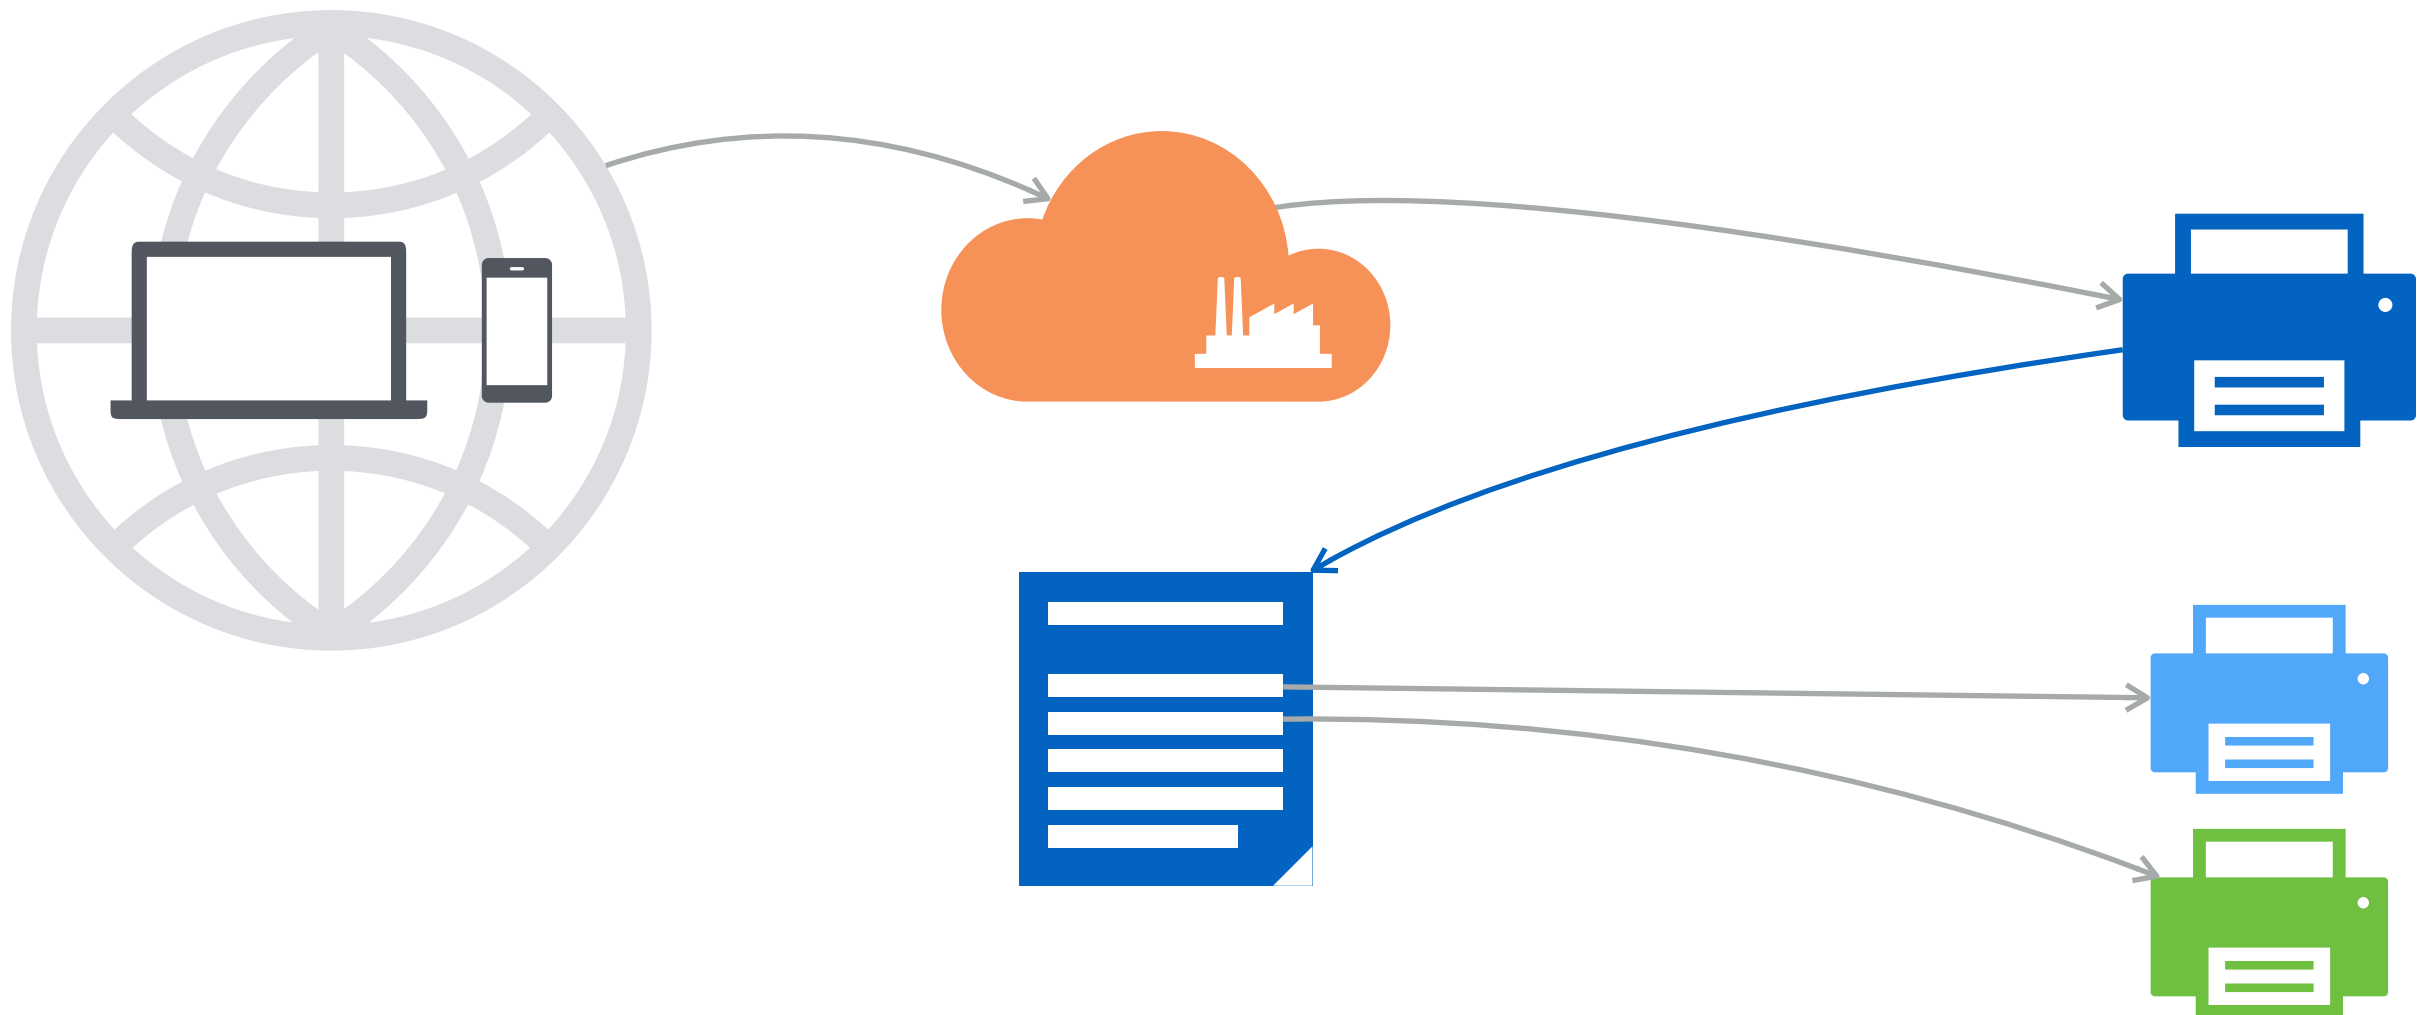

The worker responds with a website

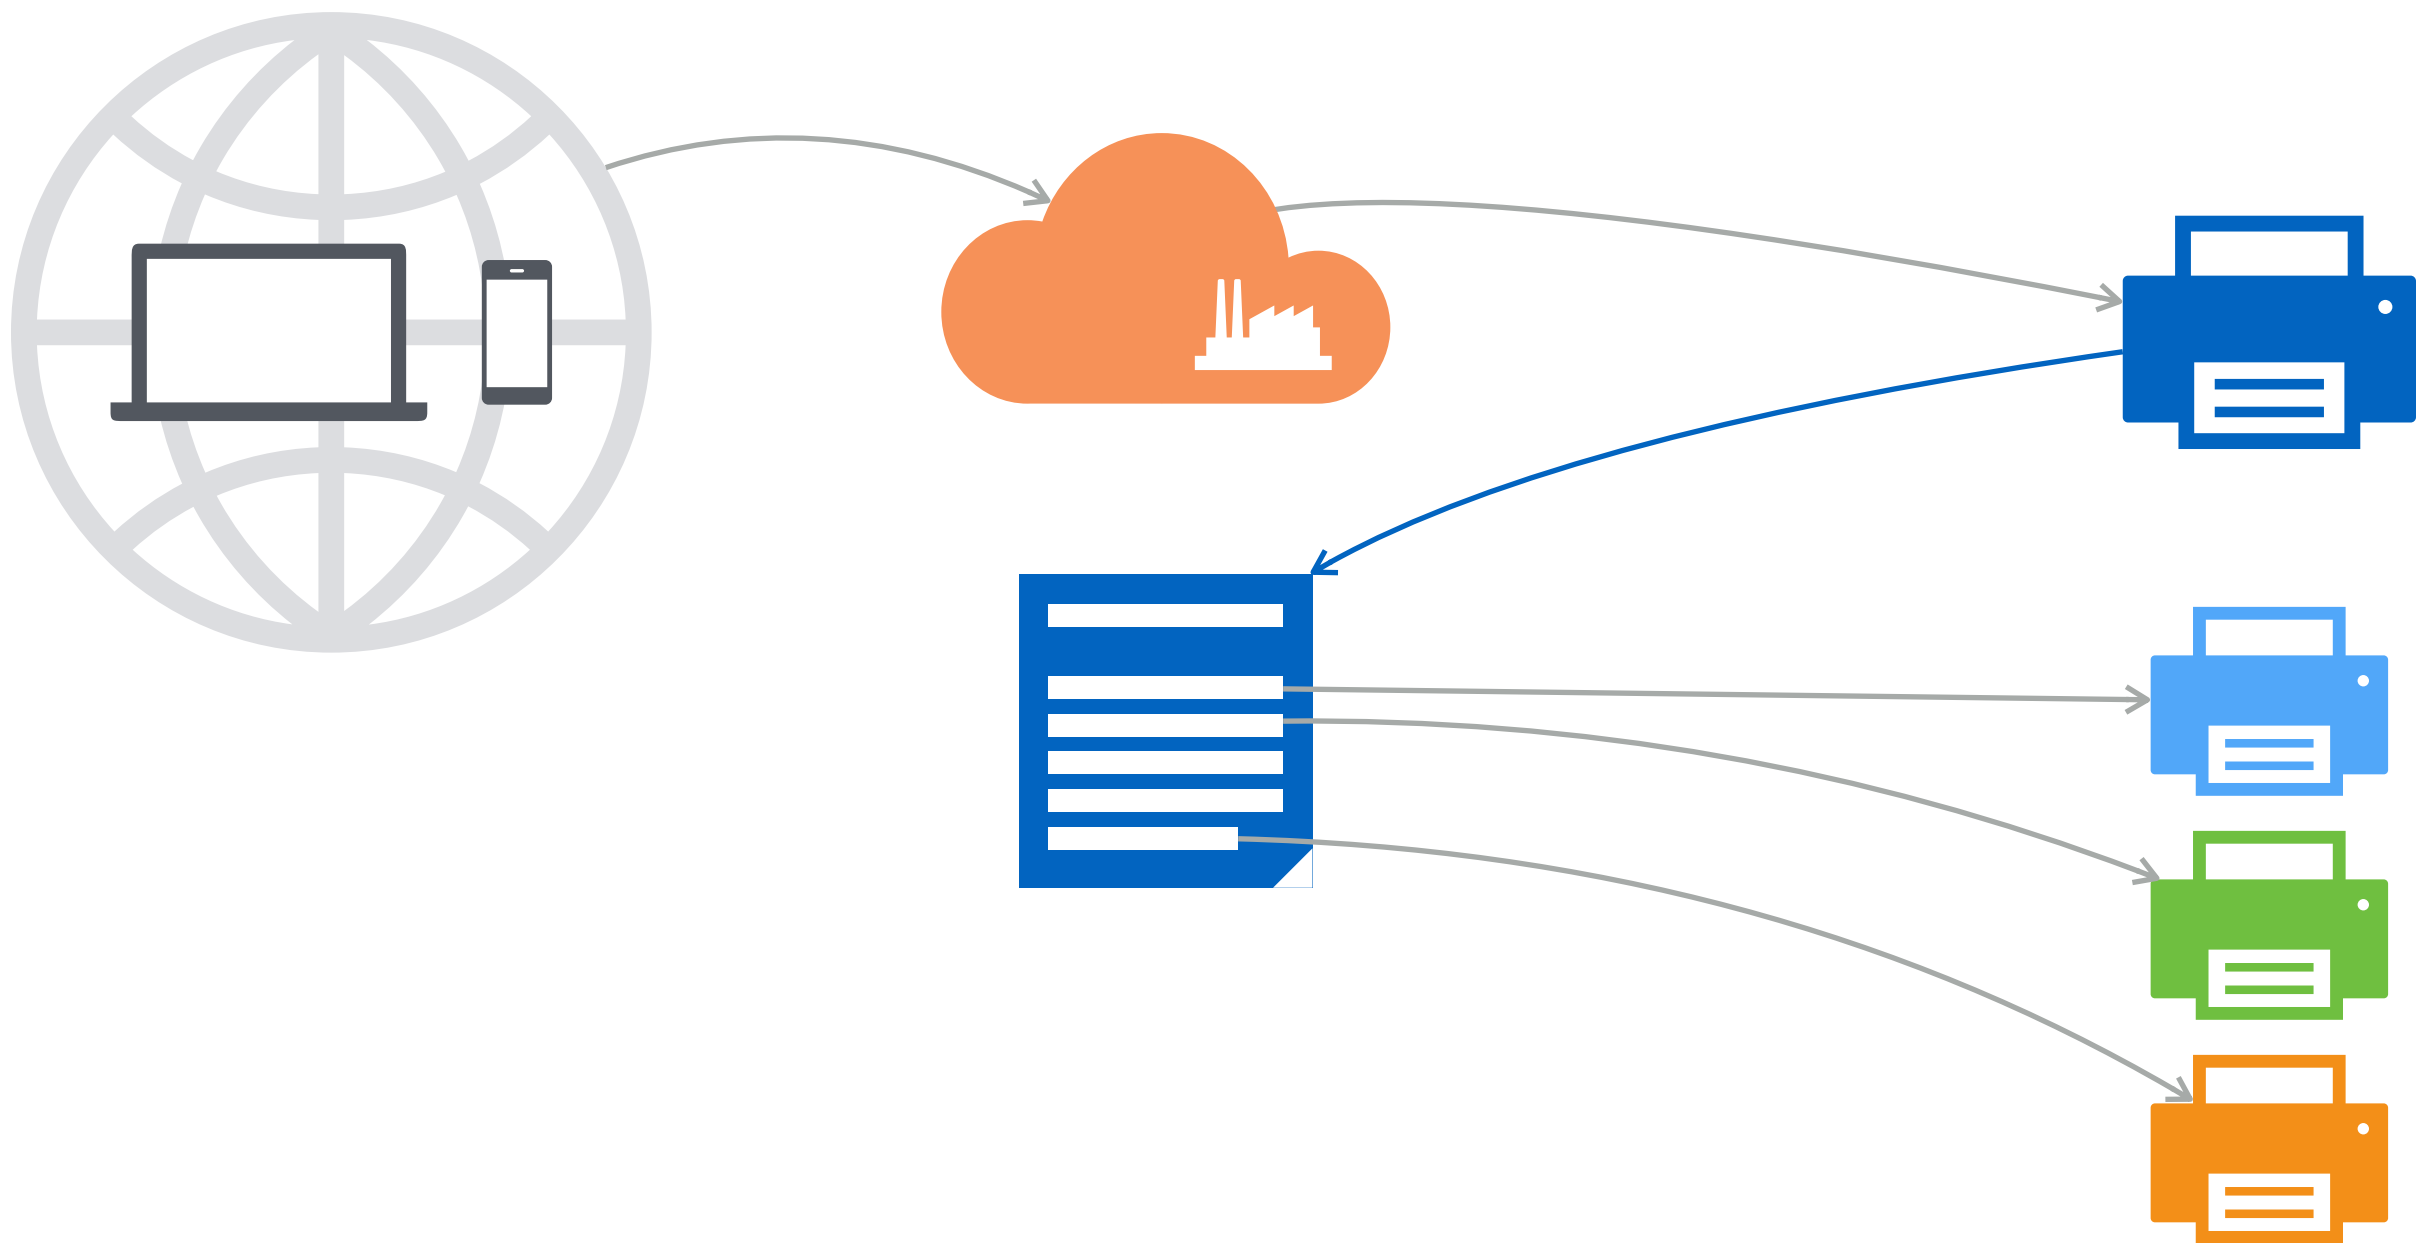

For each fragment, the worker issues an async request

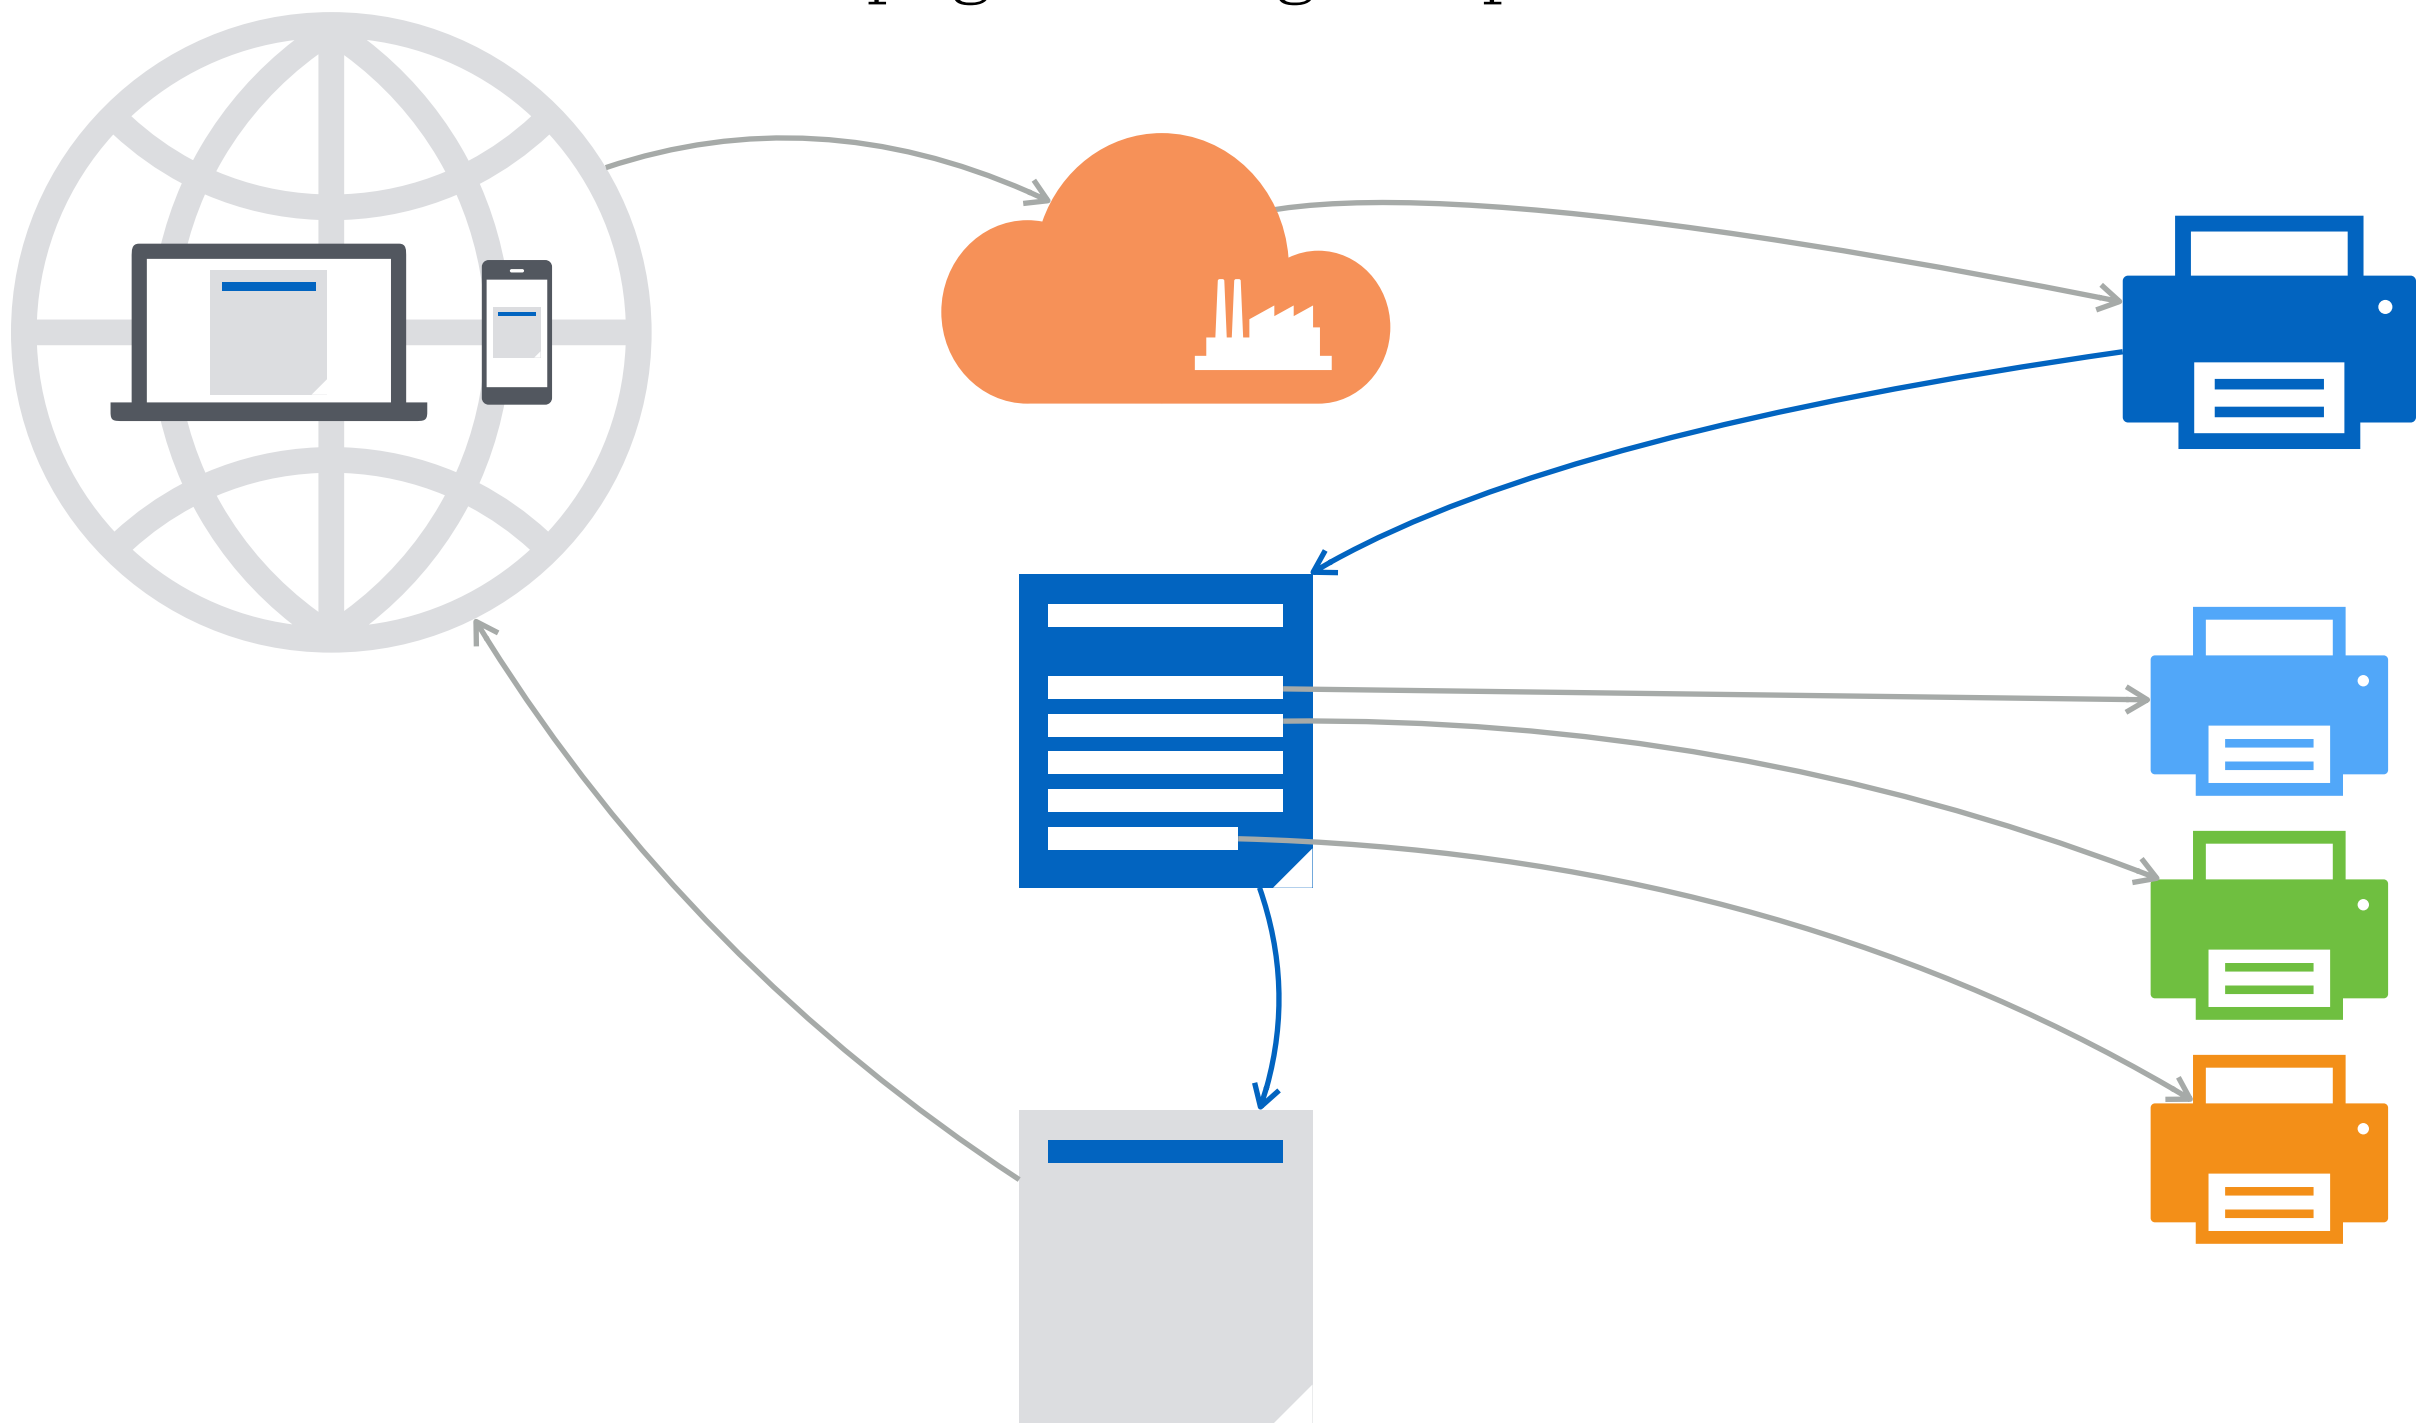

For each fragment, the worker issues an async request

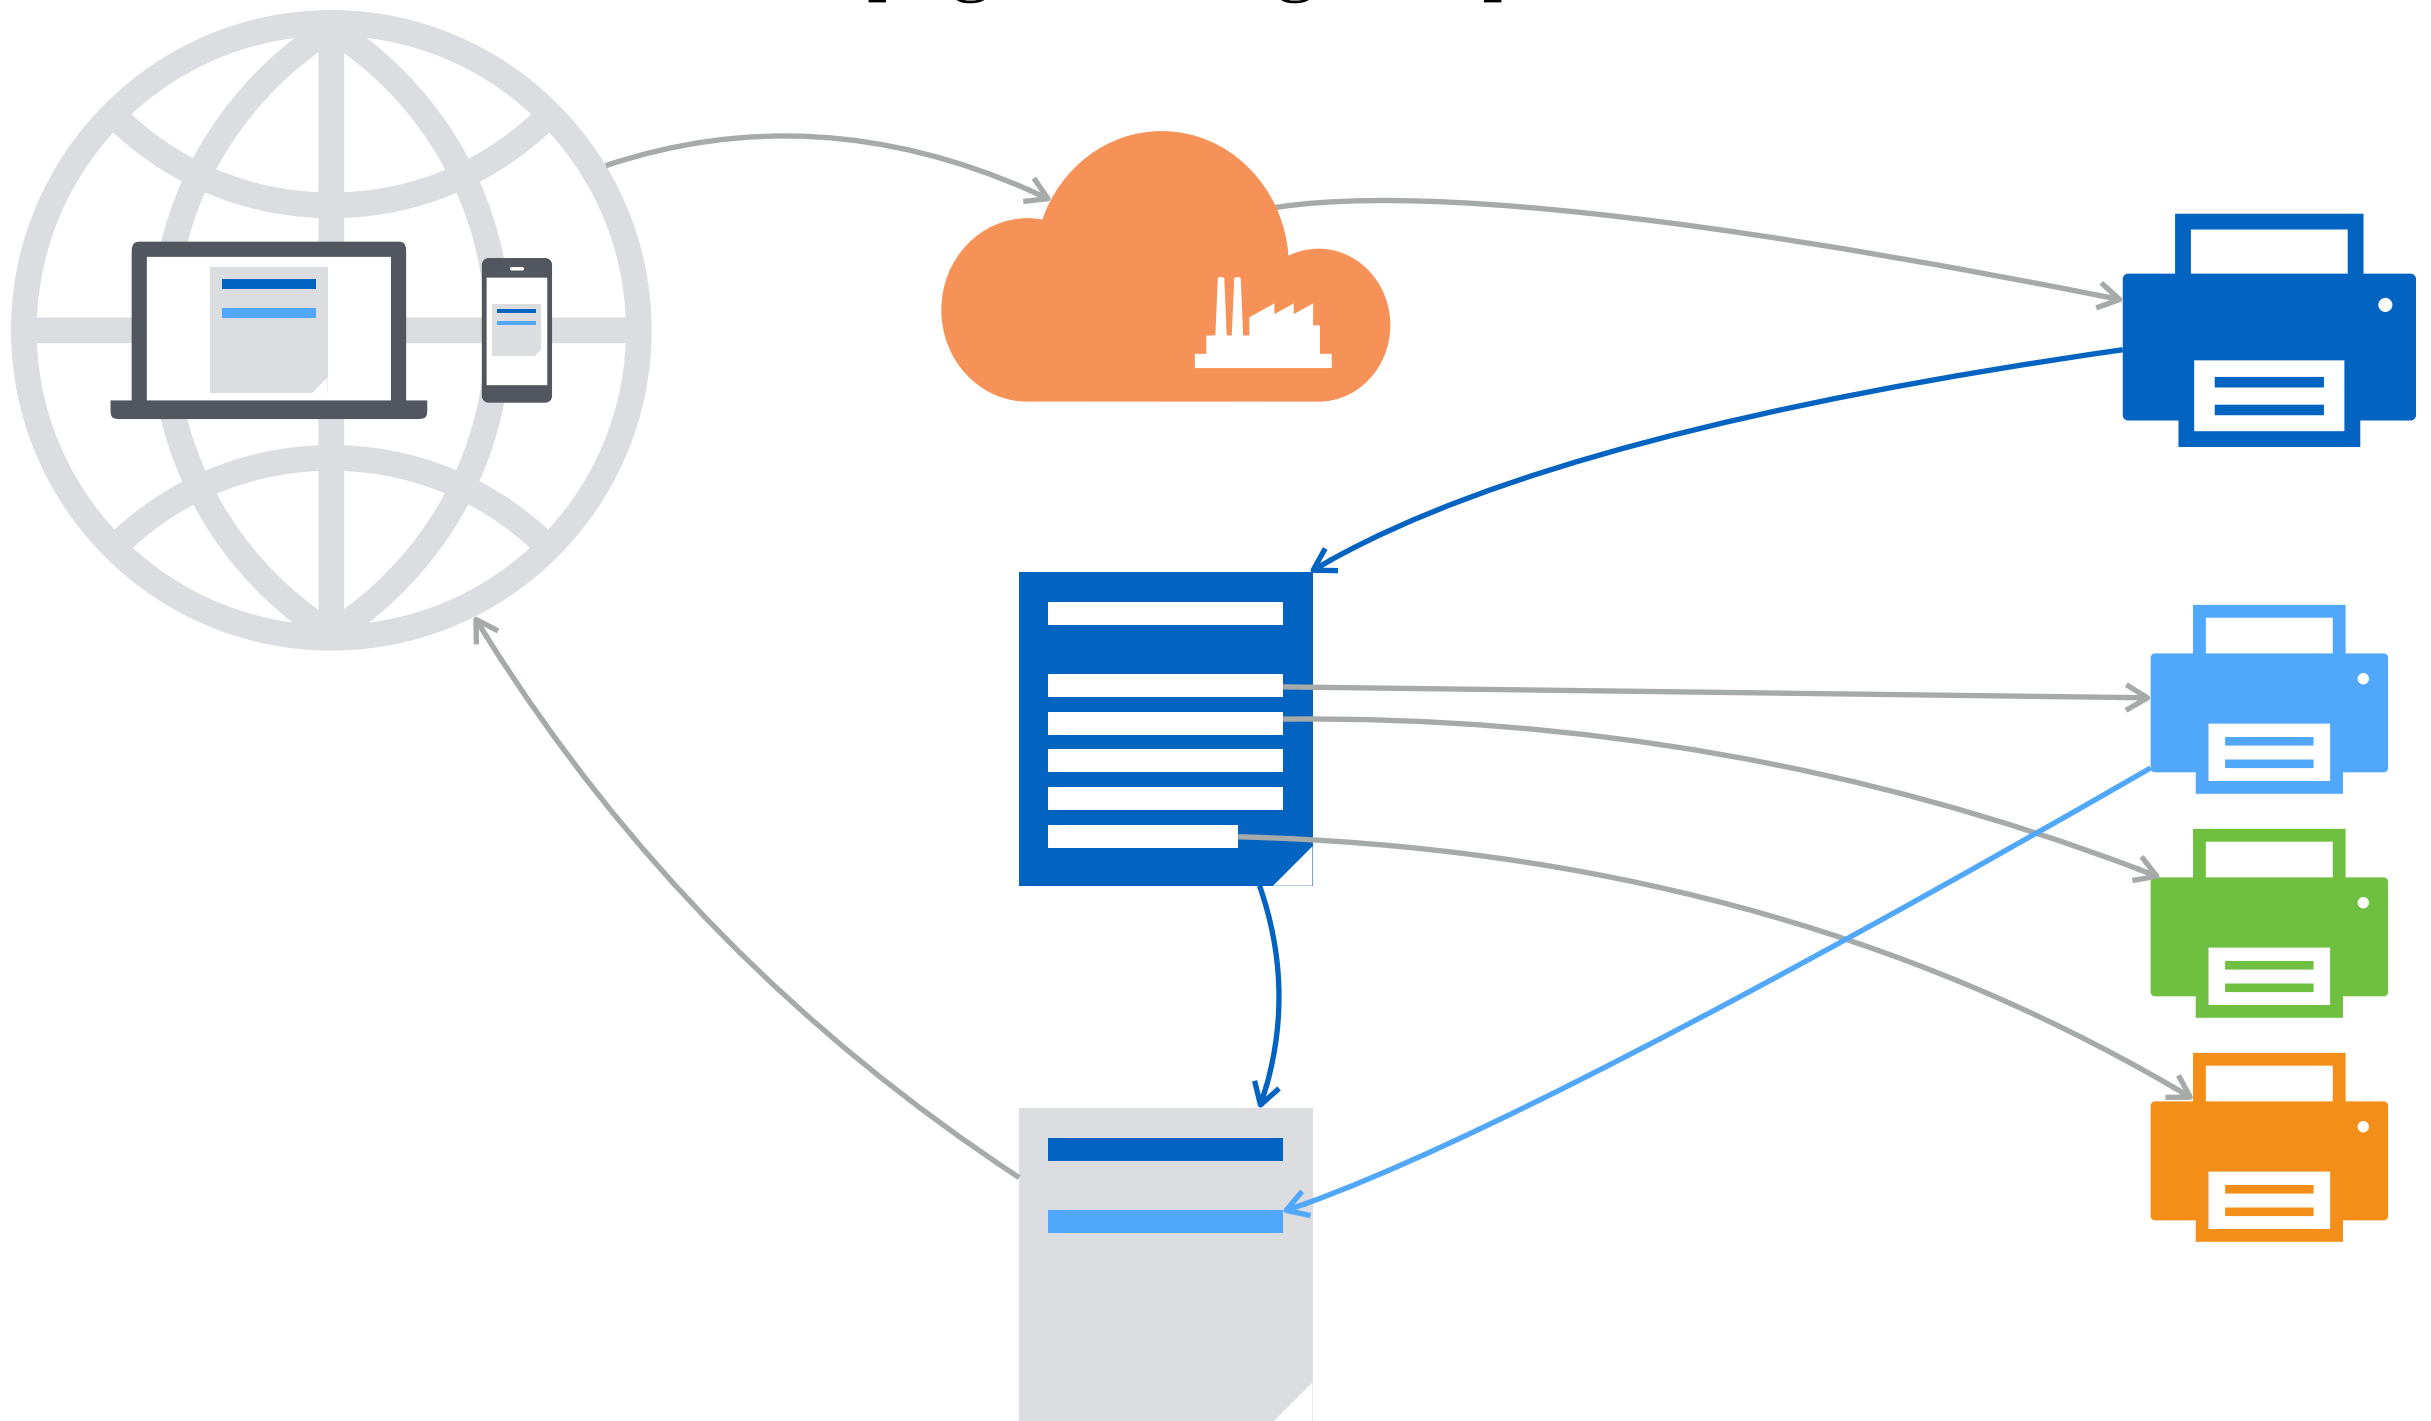

For each fragment, the worker issues an async request

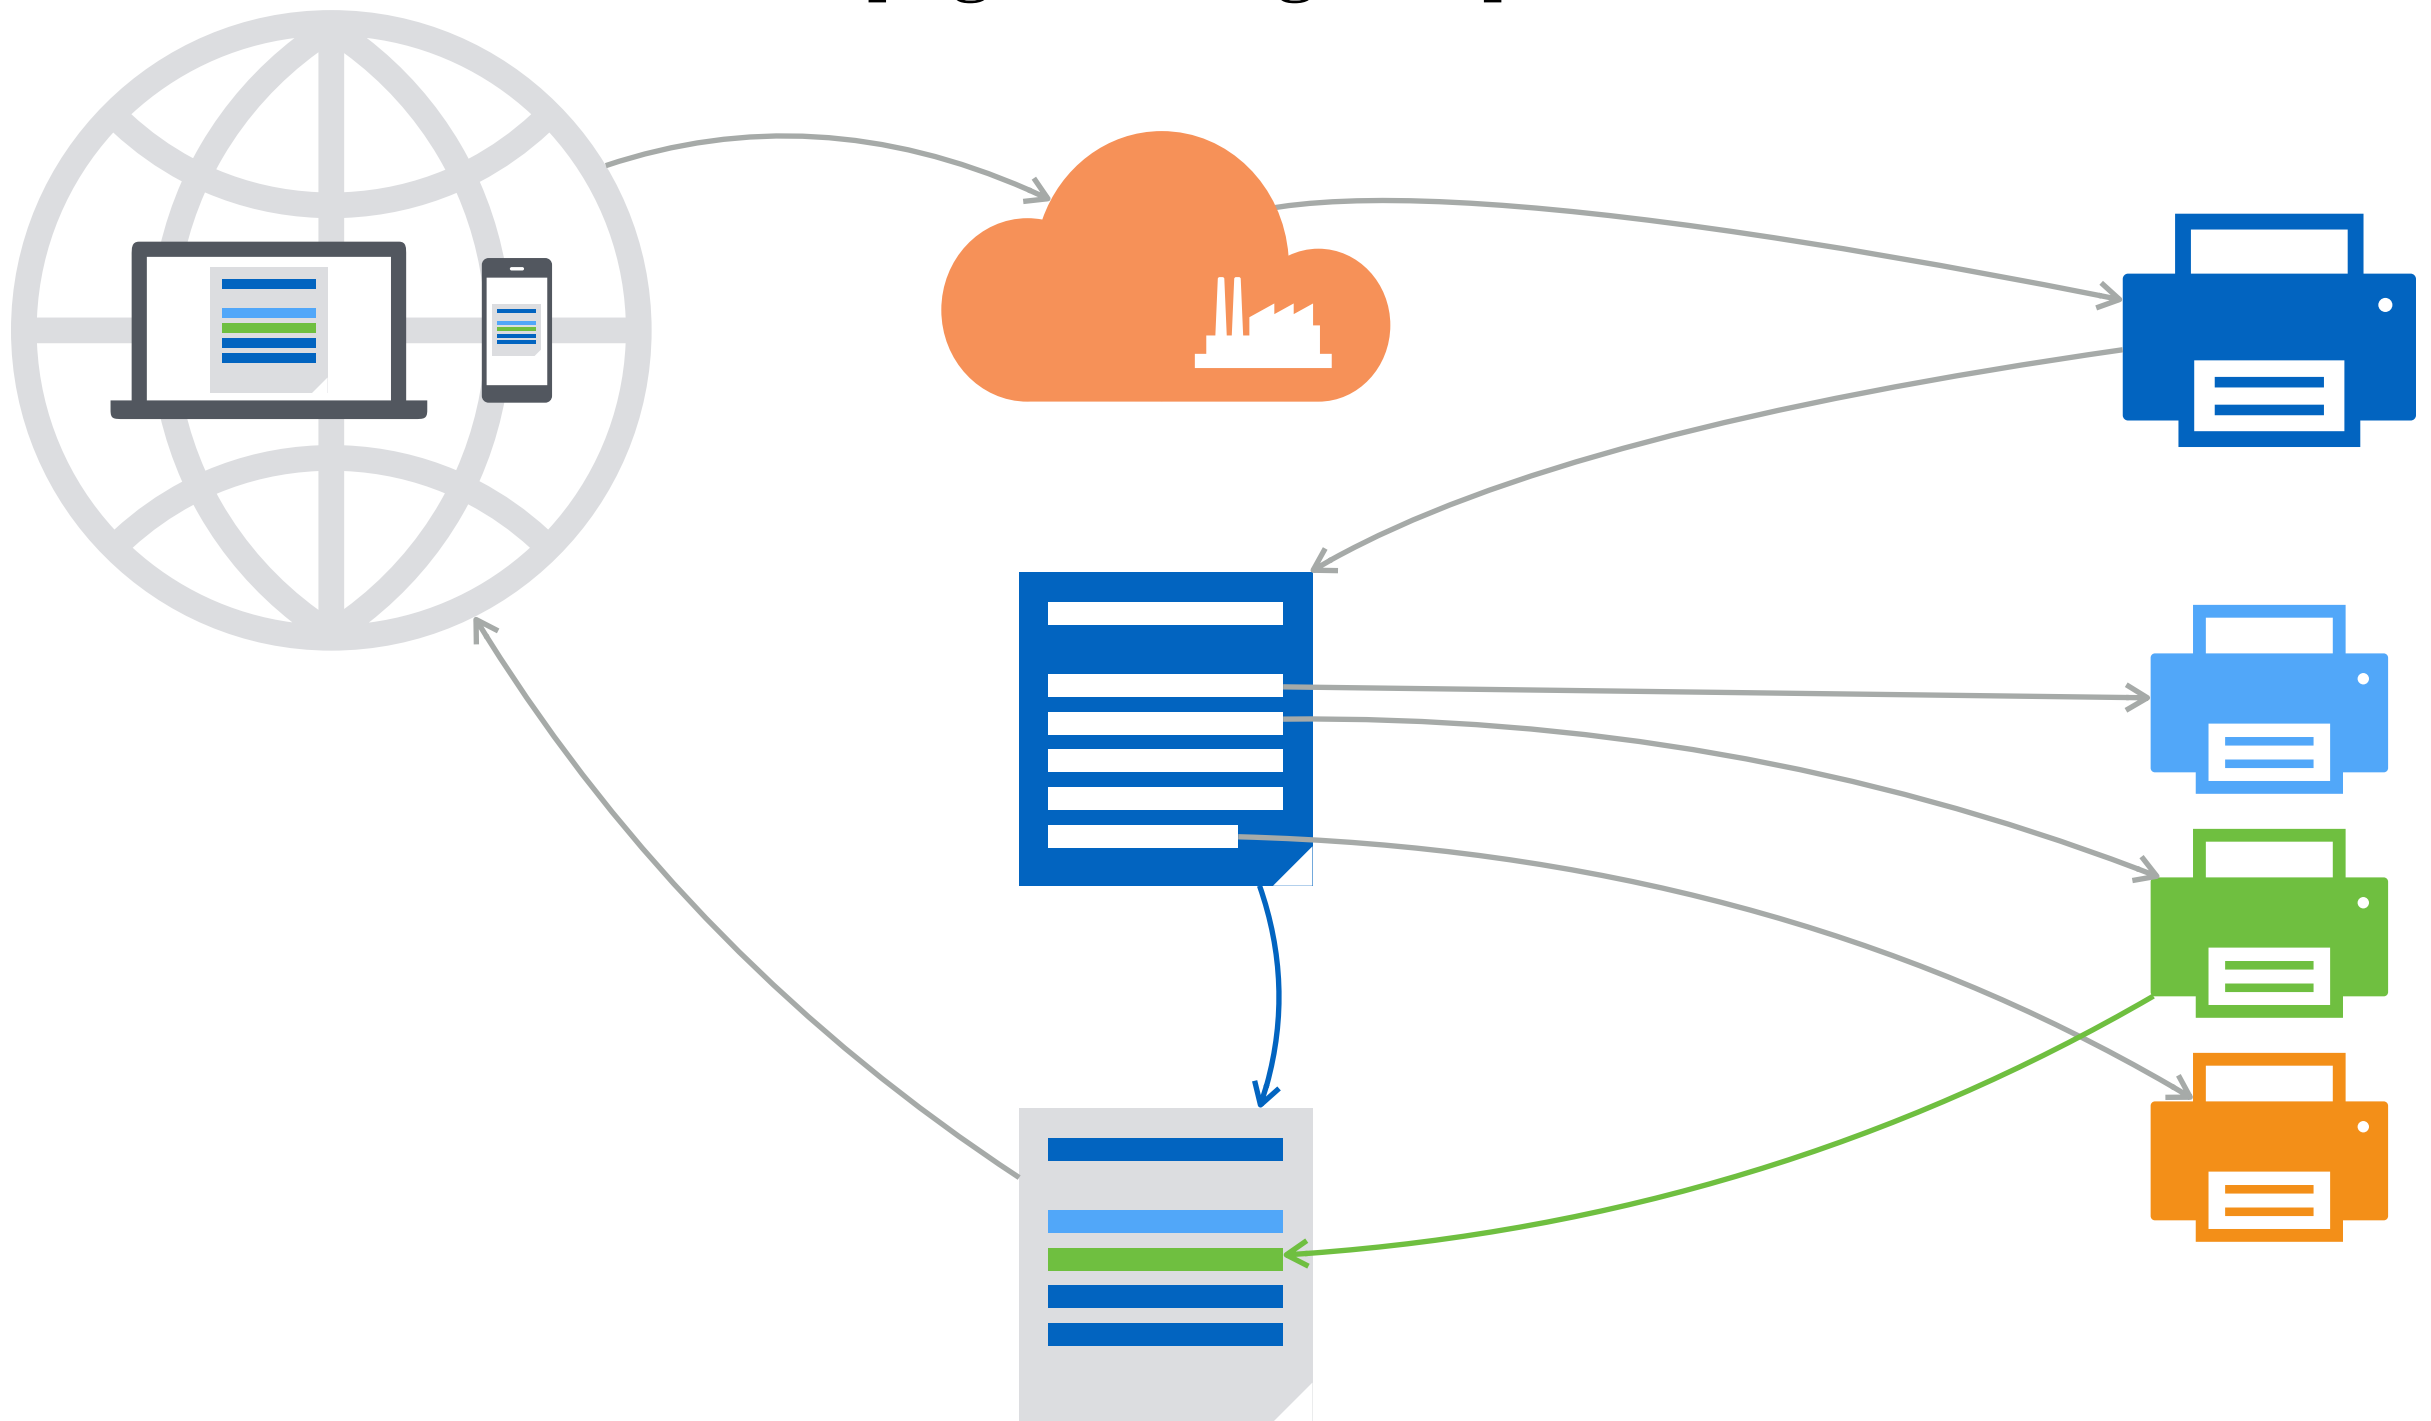

While streaming the response to the client,  
the page is being composed

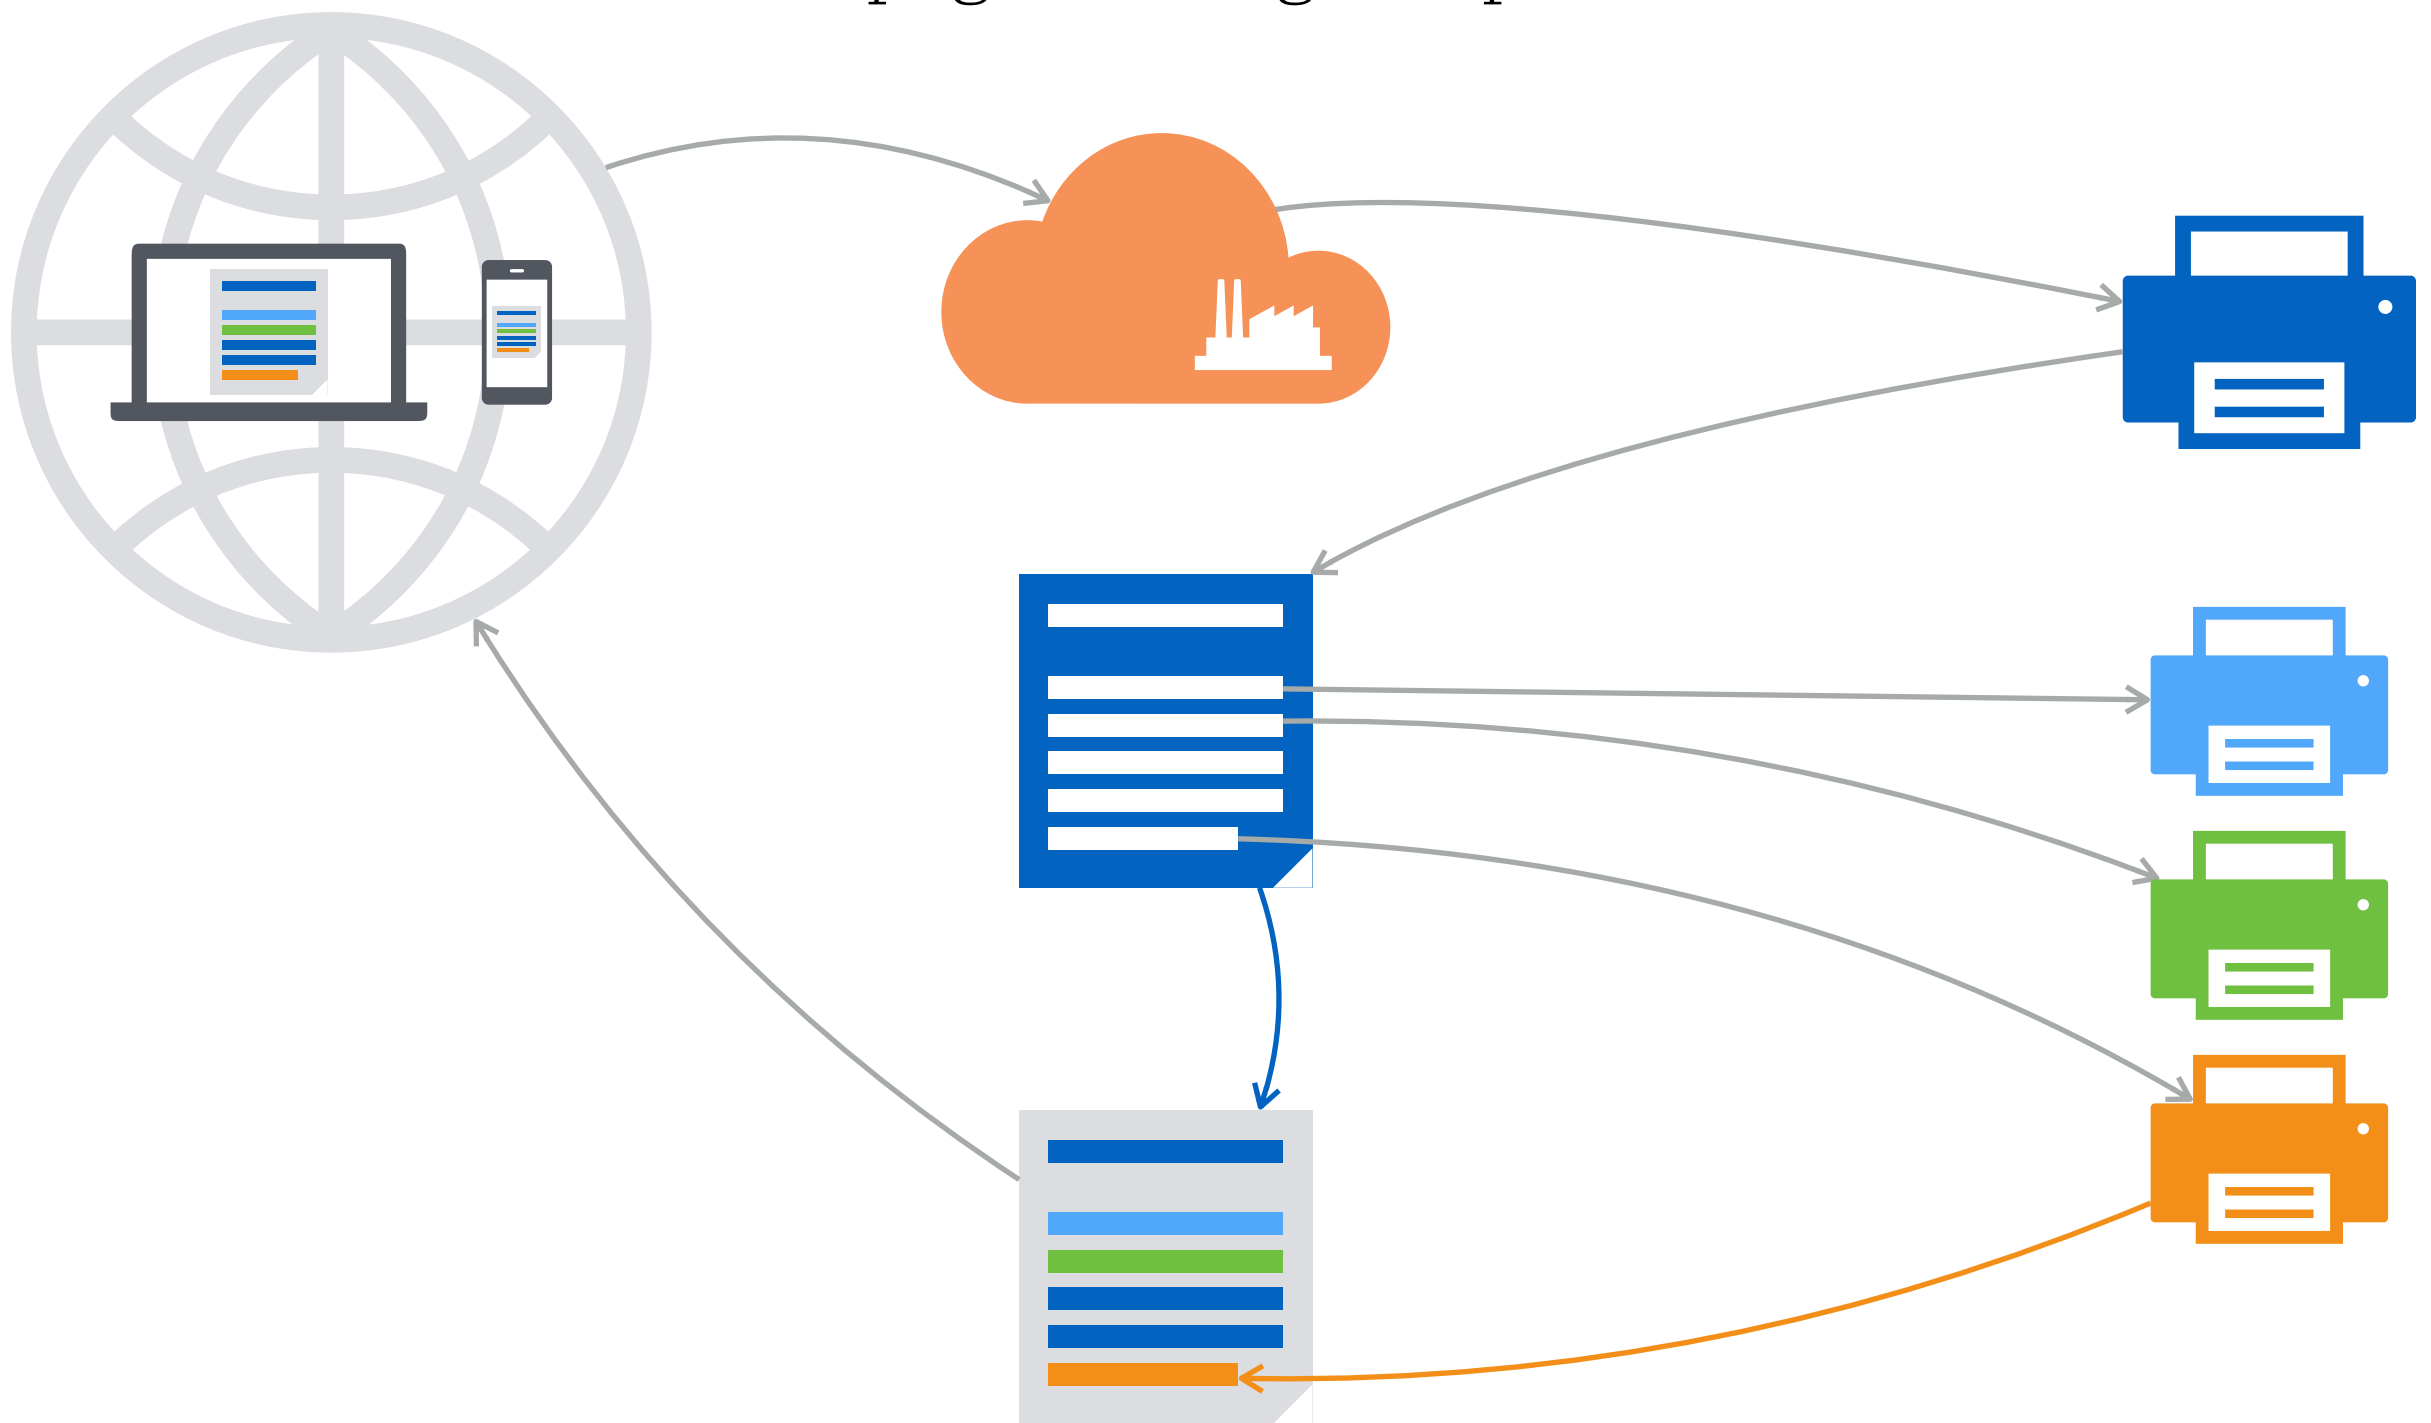

While streaming the response to the client,  
the page is being composed

While streaming the response to the client,  
the page is being composed

While streaming the response to the client,  
the page is being composed
